

Medical Software Solutions

Address

Dear Dr.

Retail Automation is a unique company that specializes in computer support, consulting, and networking solutions for the private medical practice.

We understand the focus of a medical clinic is the patients. We also understand that medical office computer systems must function efficiently and securely. To that end, we remove the burden from the doctor and office manager. We are experts in maintaining the integrity of your networks, at the same time; maintaining the security which is vital in light of the HIPAA Act.

We will keep your system from crashing, collapsing or being corrupted.

Furthermore, we are capable of implementing and training you and your staff on the latest software, including billing, charting and dictation.

We are situated in Flagstaff so we are able to respond to your onsite needs.

Dr , we know you want what's best for your patients, and like you, we provide the highest level of service with integrity. We are confident that our services will ease the headaches of maintaining a busy clinic. We would very much enjoy meeting you and or your office manager to discuss ways that Retail Automation can service your computer needs.

Please feel free to contact me directly.

Best Regards

Mark Love
